The Honorable Allen W. Dulles  
Director, Central Intelligence Agency  
Washington 25, D.C.

Dear Sir,

I take the liberty of enclosing for your perusal the article entitled - "Communism in Action".

As Founder and Executive Director of the American Motion Pictures for Freedom, Inc., I have written to Mr. Larson, Special Assistant to the President of the United States of America, asking him if our title, and the very idea of our organization may not possibly in some way to serve to Mr. Larson's plan.

I am sure that you are aware of the impact of motion pictures propaganda.

FOR EXAMPLE: During the past two years, the Soviet government and its agencies, produced over 75 motion pictures (strong Communist propaganda), against the western democracies, especially against the American Way of Life. These pictures were produced in Moscow, Babelsberg-East Germany and partly in Paris, at the Pathe Studios.

In Red China, the Soviet agencies with the Chinese government, produced over 200 motion pictures in different languages, portraying the United States as an aggressor and supporter of a new kind of colonialism.

We shall be most happy to receive your personal consideration of this matter and will eagerly await your reply.

Very Sincerely yours,

John Mac,  
Executive Director,  
American Motion Pictures for Freedom, Inc.

Why is it that, in spite of billions of dollars spent in fighting Godless Communism, in spite of the obvious fact that our motives are right and clean, while the establishment of Communist dictatorship over the world would bring to humanity untold misery and hardships, we find but little understanding and support among the still free nations, particularly, among the masses.

Those who know the evil of Communism, who are aware that Communist propaganda of lies, deceit and falsehood is but a smoke screen covering up the ugly reality of life behind the Iron Curtain, those enlightened national leaders are at a loss to answer this 64 dollar question, how is it possible that so many are being duped by so few, and for such a long period of time?

A few months ago, a small group of American patriots were gathered in a modest Los Angeles apartment trying to solve this psychological problem. They came to listen to John Muc, who described himself as one living on borrowed time, having miraculously escaped from the toughest of all Soviet slave labor camps, the one situated on top of the world, on the Novaya Zemlya Island, in the Arctic Ocean.

John Muc was a young counter-intelligence officer in the Polish Army when Hitler, and then the Red Army invaded Poland. Early in 1940, he had been taken prisoner by the Reds, tried and, on trumped up evidence, sentenced to death. Although he declined an offer to enter Soviet espionage service, his sentence was commuted to 25 years of forced labor. He went from prison to prison, each time farther north; originally by trains, then by boats and finally, after a several hundreds of miles death march in the northernmost part of Russia, his decimated transport reached the shores of the Arctic Ocean. The sea was hard frozen, so the last leg to the Novaya Zemlya Island was to be made by cargo planes. The prisoners were ordered to lie down on the floor, and they were packed in three layers, one on top of the other.

By the time of the signing of the Sikorski-Stalin Pact, in 1941, John Muc was one of the 300 survivors of the 7,000 Polish war prisoners originally sent to Novaya Zemlya. He again became a free man.

After conquering untold hardships, he reached the Polish Embassy in Kuybishev, and was assigned the task of supervising the liberation of Polish citizens from Soviet prisons and forced labor camps.

In that capacity, he travelled extensively all over Russia, thusly acquainting himself with the everyday life of the Soviet people. They told him frankly about the inhuman conditions and terror under which they were forced to live, they told him the bare truth of their misery, because they knew that he would not betray their confidence in reporting them to the bloody M.K.V.D. police.

As John Muc spoke, his listeners saw displayed before their eyes the ruthless cruelty of the Soviet regime, the untold sufferings of hundreds of millions of its innocent victims, the hopelessness of their plight, from which only death or a miracle could liberate them.

"And there and then," said John Muc, "I made my decision to devote the rest of my life to fighting the scourge of Communism."

John Muc left Russia with the Polish Army of General Anders. As a member of the Polish Military Intelligence, he worked hand in hand with his British counterpart and, later on, with the American Intelligence. His duties took him all over the Middle East and then, Italy and Germany.

Wherever he went, his only goal was to fight Communism, to unmask its predatory falsehoods by every means at his disposal. But he soon realized that the fight against such a monster could not possibly be effective as long as it remained a purely defensive one. To defeat Communism, one had to start an offensive!

The greatest weapon of Communism is propaganda.

Using outright lies and brazen distortions of facts, Communist propaganda succeeded in establishing in the minds of ignorant masses a false mirage of a better social and economic structure of modern society, the so called "paradise" of the working classes.

Not satisfied with the promotion of its own fake formula for a would be happier world, the Communist propaganda, in a front attack, but using the same methods of outright lies and distortions of facts, concentrated on vilifying and slandering the democracies.

Some successes have been scored by the democracies in counter-acting the latter part of Communist propaganda by refuting the lies, like in case of the germ warfare in Korea. It, however, did not perturb the Kremlin in the least. They went on, and on, constantly repeating the same lies, using every opportunity to hammer them into the gullible minds of the masses.

If the free world remains on the defensive, if it leaves the initiative of the attack to the Communist propaganda, there is little hope left for a final victory. And here is the answer to our 64 dollar question.

The democracies have failed to make use of the only decisive weapon at their disposal, which is, to expose to the masses what life, under the Communist dictatorship, has in store for them. The only

effective way to do it is through the motion pictures shown both in theatres and on television.

The Soviet propaganda has realized long ago the potent influence on human minds of the moving pictures. All over the world, especially in Asiatic countries, Soviet films are selling to the masses the fiction of their "workers' paradise". In the same time, the world is being flooded with vicious Soviet films depicting the "misery" of the workers in capitalist countries, the United States in particular.

"In Teheran and Bombay", continued John Muc, "I have seen such films. I also saw the reaction of the audience. The amount of hatred provoked by such a film is something frightening. Poor, backward people that neither listen to the radio nor read papers, nothing said about books, were leaving the theatre in a frenzy of indignation, all hating America, all despising democracy, most of them convinced that hope for a better future could only come from the noble apostles of human rights, from the wise men of the Kremlin."

"Then only, I realized the full meaning of the information which I obtained, while in Moscow, that a special staff of renegades from different countries is working day and night on preparation of propaganda films to be produced in some 50 languages and dialects. Then also, I came to the conclusion that to fight effectively Communist lies, we have to bring that fight within the reach of the masses by unveiling before them the hideous truth about life under Soviet rule.

"I have no personal means to conduct such a fight, but I have the know how. I am sure that we can find more men who are intimately acquainted with the plight of the people behind the Iron Curtain. Let us use them all, let us use the best writers, the best actors, directors and producers, and let us start fighting Communism by revealing the horrid truth hidden behind the smoke screen of the insidious propaganda.

"I am convinced that we can find enough good Americans believing in God, attached to freedom, relying on justice, aware of the mortal danger threatening the human race, and ready to take an active part in the fight for the survival of our free world.

"Their willingness to support financially the Crusade of Truth through motion pictures, may spell the difference between winning the cold war against Communism, and to have to fight it out on the battlefields in the age of atom and hydrogen bombs."

After a moment of meditation and a silent prayer, the undersigned dedicated their sworn efforts to bring forth the American Motion Pictures for Freedom Program to full manifestation. This cannot be done alone. We solicit the help of all people of good will who will serve with us on a Committee for the sole purpose of bringing this Human Crusade to maturity.

"MUNDUS VULT LEONEM"

LENIN: "Side by side with imperialism is unthinkable, finally, either one or the other will be victorious".

"COMMUNISM IN ACTION"

At the present time, many "important people", press, radio and TV., are trying to convince (consciously or unconsciously) the people in the United States and other countries, that the present big boss Nikita Khrushchev is good and honest leader, and the Communism has changed his spot and political color.

Generally speaking, there is no "good and honest leader" in the Kremlin gang, or there is no different political color of the International Communist Party. There is no different Communism, or differences between the "Old Party Line" and the present "New Party Line", accepted by the Kremlin. Also, there is no differences between the Lenins and Stalins approach to the International Revolution, or possible decisive war.

In the fourth decade of the International Communist Party, I would like to open just one page of my book.

From 1917 to 1957.

During the years of those fourth decades, the International Communism mastered hundreds of international tragedies: Revolutions, Wars, Sabotages, Espionages, diplomatic trickery, and bloody assassinations, for example; (Castillo Armas of Guatemala, Anastasio Somoza of Nicaragua and Jose Remon of Panama).

During this time, over 50 millions of people were murdered, and over 30 millions were deported to the glacial land of North Siberia and China's Tsaidam.

COMMUNISM: "Plus ça change-plus ça reste la même chose". Communism is a satanic organization and religion, created by the Utopian philosophers, lead by Karl Marx, Engels and other unsatisfied creatures on this beautiful Earth. Unscrupulous "men", driven by the lust of power, believing only in and relying on brutal abject slavery and, on their blood, sweat and tears, to build a "New Satanic World" for the benefit of a small ruling class, subservient to self-appointed masters and dictators.

So, this is Communism and "Communist Society", to present day respected by the so called Christian and non Christian governments and Christian Societies, sometime, with their respective press, radio and televisions.

In these days, many, calling themselves "distinguished" personalities with plenty of money or political power, fall into the Communistic trap; quite a number of them joined the Communist Party, Espionage and for personal cover, the "Liberal Way of Life", hastily organized in each country, "Unware or Aware" that they are joining an international, foreign dominated conspiracy, thus committing an act of treason against their own country and the free world.

COMMUNISM is a Party, a politically bloody party, and not a "Social Organization", according to the Merriam-Webster Pocket Dictionary. COMMUNISM is a well organized military organization, divided for several branches, for example: Red Army, International Brigade (United States Lincoln Brigade), Labor Revolutionaries, Political Police Force, Financial Brigade, and Special Units for special assignment, Intelligence and Counter-Intelligence Units.

And here lies the tragic misunderstanding; instead of fighting the criminal conspiracy of international gangsters, instead of calling a spade-a spade, we have let ourselves to be drawn into an ideological fight with its consequences of complicated, doctrinal and philosophical reasoning and argumentation, far beyond the intellectual capacity of the people.

The imagination of the people respond with ease to unscrupulous, false mirages of a better world, as cleverly described by the Soviet propaganda machine; they believe in their seductive promises, and the conception of a Soviet "workers paradise" has irresistible appeal.

Cleverness of the Soviet diplomacy and propaganda machine: After the disappearance of Marshal Stalin and Marshal Beria, and also, not so long ago, the removal of comrade's Molotov, Malenkov, Shepilov and Kaganovich, the big boss Nikita Khrushchev, cleverly used the western democracies candour as a excellent cover for his political necessity, and to restore the so called "Leninism" or National Communism, at the price of the western democracies.

Presently, the Soviet Union, Red China, Tito's Yugoslavia and other satellite countries, are using one of the latest method of Soviet propaganda, which is: "The Soviet Sputnik", and the Soviet Intercontinental Ballistic Missile, which undoubtedly has been stolen from the American laboratories.

All this happened as the Soviets through their masterfully directed Intelligence Service, obtained a complete Intelligence report, concerning the weakness and "willingness" of the western democracies.

QUO VADIST? At the present moment, the Soviet block retains the initiative and the threat is now greater than ever. The Soviets want to separate American States from Europe. They have the largest submarine fleet the world has ever know. The Soviets objective is to neutralise Europe by diplomacy and subversion; to cut communication between America, Europe and Africa, to isolate Turkey, and then, with all their power to strike for total domination of the Middle East, and possibly the whole of Africa. If it does happen in the conditions, Soviets are trying to create, the position will be extremely serious. It will mean a major conflict in very adverse conditions. If the necessary effort had been made five years ago, the present situation would be far less dangerous.

The Soviet Intelligence is keenly interested in the Caribbean area situation; Panama, Dominican Republic, Jamaica, and especially in present Cuban situation.

Colonel of MGB, "Antonio" Vincente Lombardo Toledano, is the most powerful Soviet agent in Mexico and Central America. Toledano is trying to organize a "New Operation Ring", to smuggle more reds from the European Communist International Brigade to Central America.

Colonel of MGB, "Paul" Romulo Batancourt, created a "New Committee of the Soviet South American Union". Batancourt is organizing a "NEW FRONT" against the Cuban Independence.

"The North American Soviet Ally". Two of Mexico's most picturesque communities, ~~Mexico City~~ Cuernavaca and San Miguel de Allende, have become the most of the United States Communist Party, and the Soviet Intelligence Operation.

The Party Staff: Samuel Novick, Alfred Stern M. Dadd Stern  
F. Vanderbilt Field, Albert Malts,  
David Drucker, Asa Lutz, Max Shlafrock  
Jacob Epstein, and many more others.

A number of these party members serve as agents for the Soviet Espionage in the United States and other countries. There is little asceticism involved in their choice of present NEST. is a sunny, flower-filled "Center" for "WEALTHY AMERICANS" and Mexicans. During the last couple of years, this Espionage Center was visited by hundreds of so called "distinguished friends" from Hollywood New York and Europe. These Soviet conspirators and agents are financially supported by "WEALTHY AMERICANS", and also, by the Soviet Embassy in Mexico.

At the present moment, the United States Communist Party infiltration has shown some sign of increasing their activity in underground position, and also, the party agents are active among the Colleges, Universities and Government agencies.

LENIN: "The victorious proletariat of one or several countries, having expropriated the capitalists and organized Socialistic production, would stand up against the rest of the world, the capitalist world, attracting to its cause the oppressed class of other countries, raising revolts in those countries against the capitalists, and in the event of necessity coming even with armed forces against the exploiting classes and their states."
